Auto Microneedle System

QMS

Dr Pen Micro Needling QMS facial:

Micro needling, Face

R1050

Micro needling, Face and neck

R1350

Cleanse, numbing cream, hyaluronic serum, micro needle, algae mask, collagen, Heliocare XF spf 50

Includes scalp, hand, foot, and décolleté massage OR soak, scrub, file and paint on hands OR feet

Needle is opened in front of client. Gloves, mask and apron will be worn by therapist. Disposable consumables will be used.

Hyaluronic serum:

Key role in protecting, stabilising and plumping your skin at the cellular level. Boosts skin elasticity, promotes healthy cell turnover and rejuvenates the appearance of dry and dull skin

Algae mask:

Soothe, calm and hydrate. The mask bonds tightly with dead epithelial cells. When the mask is pulled off these epithelial cells are removed along with it. A further important aspect of the Algae mask is its extremely pronounced capacity for providing moisture.

Night collagen sensitive:

Hydrating and soothing night serum for sensitive skin. Its advanced formula helps to deliver even greater benefit in reducing irritation and supporting the natural regeneration of the skin

Heliocare XF spf 50:

Unique topical sunscreen in an innovative extra-fusion gel formulation that melts into the skin for invisible protection against daily environmental challenges. Suitable for most skins but especially for dry, dehydrated skins requiring more moisture.

LED light mask therapy treatment:

Red LED light acts on cells in the skin known as fibroblasts, which play a role in production of collagen, a protein that makes up a large part of connective tissue and helps the skin to recover when it's harmed

Why come for micro needling:

The purpose of this treatment is to generate new collagen and skin tissue for smoother, firmer, more toned skin. Micro needling is mostly used on the face and may treat various scars, wrinkles, and large pores.

Home care advice:

24 hours after treatment:	Avoid for 72 hours after treatment:	Avoid for one week after treatment:
Drink plenty of water to hydrate and to help heal your skin faster	Tanning beds	Powered make up brushes
Only use chemical-free topical lotions	Make up	Alpha and Beta hydroxy acids
Cleanse skin with lukewarm water and a gentle cleanser	Swimming	Retinol (Vitamin A)
	Exercise/sweating/ vigorous activities	Vitamin C
		Exfoliators
		Sun

Ultimate home care package *(can be purchased individually)*

QMS night collagen sensitive: 30ml, R1180

Specifically developed to work with the skin's regenerative process at night, this concentrated serum intensively moisturises multiple layers of the skin, calms redness and inflammations of the skin and reduces signs of premature skin aging. Key to the exceptional effectiveness are the innovative Neotec A15® Collagen Hyaluronic Acid and Matrixyl 3000 complexes

Heliocare spf 50 gel: 50ml, R310

Key Ingredients include Fernblock, a natural plant extract from Central America with proven photoprotective properties together with technologically advanced filters that provide broad-spectrum UVA/UVB protection. There is an optimal balance between mineral and non-mineral filters to ensure maximum tolerability and cosmetic compliance. Sunsphere Technology increases the effectiveness of the filters, permitting reduced quantities of filters and thus lowering the potential risk of sensitization and allergies and improving cosmetic characteristics. Non-comedogenic. Paraben-free. Leaves no residue on the skin. Suitable for dry and dehydrated skin

Dear Deer white standard satin pillow slip, 45x70cm: R200

PETA approved vegan. Minimizes facial wrinkles and puffiness. Won't absorb face creams and serums. Soothing on the skin after facial treatments or procedures. Anti-aging. Hypoallergenic.

LumiGlo hydration booster sheet mask: R100

The hydration powerhouse Hyaluronic acid added to our CBD skin care infused sheet mask will give you some serious moisture, plus, get the added radiance of plumped, smoothed and glowing skin

- Treats & reduces ice pick and chickenpox scars
- Treats & diminishes hyperpigmentation
- Treats & diminishes age spots & sun damaged skin
- Treats & diminishes enlarged pores
- Significantly improves the appearance of stretch marks
- Boosts collagen and elastin fibres by up to 1000%
- Enhances absorption of skin/hair products by up to 2000% so they are able to work more effectively.

HOW DOES IT WORK?

Dr Pen consists of two parts: an electric hand piece that plugs into the wall for a stable and consistent source of power, and a 2 needle tips, each containing 12 microscopic needles.

Dr Pen system. With its 12-tip needle head and a motor that produces close to 110 revolutions per second, the Dr Pen is able to deliver an impressive 1,300 holes per second, ensuring the most dramatic results. The internal motor causes the needles in the Tip to oscillate at a rate of close to 110 revolutions per second. When the needle tip makes contact with the skin, the needles create tiny puncture in the skin's surface, causing micro-trauma, and inducing an immune response, and subsequently, the creation of new healthy collagen. The punctures also act as micro-channels that carry topical nutrients used during the treatment deep into skin layers for an increased effect. Because the needles oscillate as quickly as they do, the tip of the Pen easily glides across the skin, without catching or causing any dermal tearing. This small, easy to operate device is able to produce similar, if not better, results to a fractional laser, without the risk of hyper or hypo-pigmentation, as well as other side effects and downtime associated with these effective, but potentially damaging ablative heat based treatments.

DOES IT HURT?

Dr Pen offers multiple needle lengths to treat your specific skin goals. They range from 0.25mm to 3mm. Numbing cream is not required but you may find it more comfortable to use a numbing cream because it glides over your skin, it is much kinder on the skin.
